

For us at GLS, innovation is for the good of sustainability

At GLS we are committed to reducing our negative impact on the environment on a daily basis, working with our partners and suppliers to ensure a better future for the planet and future generations. In addition to actively converting our fleet to **electric or bio-LNG vehicles**, and converting our facilities to **eco-friendly buildings**, we support projects around the world with our **Climate Protect** program to assist local communities and

help safeguard the environment.

From 5 to 7 October 2022, we will also be present at the **Green Logistics Expo** at the Fiera di Padova.

Our commitment is serious, we want to realise our ambition at all costs: to offset and reduce CO₂ emissions in order to achieve climate neutrality in 2045!
